4th WATER LOSS FORUM TURKEY
SU KAYIP VE KAÇAKLARI TÜRKİYE FORUMU

www.waterlossforum.org

THIS FAIR IS ORGANIZED WITH THE AUDIT OF TOBB (THE UNION OF CHAMBERS AND COMMODITY EXCHANGES OF TURKEY) IN ACCORDANCE WITH THE LAW NO. 5174

The phrase “It isn’t right to construct the superstructure without a strong infrastructure” was the most striking statement used by the Minister of Forestry and Water Affairs Prof. Dr. Veysel Eroğlu during his opening speech at the 1st No-Dig Turkey organized on 18 November 2011 by the Turkish Society for Infrastructure and Trenchless Technologies (TSITT).

Despite urbanization in Turkey having increased rapidly in the past thirty to forty years, urbanization was widely understood as constructing buildings. Unlike the developments in construction of superstructures, it is fairly difficult to say that there have been efforts to lay or repair infrastructure lines such as drinking water, sewage, natural gas, communication, energy, etc. with high-quality materials and skilled labor.

In accordance with the National Environmental Strategy (NES) document prepared by our State within the scope of the 2023 vision and approved by the High Planning Council, it is predicted that between the years 2015 – 2023 the required amount of investment for drinking water infrastructure will be 7 billion 872 million Euros and the required amount of investment for sewage infrastructure will be 11 billion 582 million Euros.

With the Regulation on Controlling Water Loss in the Water Supply and Distribution Systems that was published on 8 May 2014, it has become a legal obligation for all municipalities and water administrations to reduce water loss. According to TurkStat statistics, the percentage of water loss in our country has been identified as 43.6% and the yearly cost of these losses on the country’s economy has been determined as more than 6 billion TRY. Municipalities and water administrations, that have been placed under the obligations of reducing water loss to a maximum of 25% by 2023, need to make technological investments of 3 billion TRY annually.

As an investment of 7 billion Dollars, the Trans-Anatolian Natural Gas Pipeline (TANAP) which is still being constructed is expected to be completed in 2018 has become one of the most important projects of the infrastructure sector.

Along with the 4th Water Loss Forum Turkey where many national and international public and private sector representatives will be sharing their experiences, the Fair and Summit on Infrastructure and Trenchless Technologies, which will hold a light to the future of our country’s infrastructure lines such as drinking water, sewage, natural gas, energy, communication, etc., will be a highly successful platform for all participants and visitors.

WHY YOU SHOULD EXHIBIT?

Aim of the Fair: To bring together all of the parties engaged in the planning, designing, implementation and management processes of projects; such as, service recipient public bodies, service providing private companies, subcontracting companies, universities, non-governmental organizations and companies that provide materials, machinery and equipment. The only platform where people can view and gain information on Turkey's infrastructure projects.

- The only sector-based experts' Fair where private one-on-one business meetings are planned systematically.
- A strong Fair that will bring together all relevant organizations in Istanbul; the center of developing industry and close to other developing industrial cities.
- Held at the same time as the 4th Water Loss Forum Turkey organized by the Ministry of Forestry and Water Affairs and with the support of State Hydraulic Works.
- The most comprehensive organization in its field that has been organized to develop the industry connections, customer relations, sales networks and brand recognition of the participant companies.

PROFILE OF EXHIBITORS

- Water and Gas Leakage Detection Systems
- Pipes and Cable Detection Systems
- Ultrasonic and Electromagnetic Measurement Systems
- Fiberoptic Test and Maintenance Equipment
- Cable Fault Measurement Systems
- Manhole Covers and Metal Detectors
- Pipe and Line Freeze Seal Services
- Manhole Manufacturers and Casting Companies
- GIS (Geographic Information System) Companies
- Material Quality Control Test Centers
- Infrastructure Asset Management Companies
- Pipe Manufacturers and Importer Companies
- Pump Manufacturers and Importer Companies
- Valve Manufacturers and Importer Companies
- Horizontal Drilling Service Companies
- Horizontal Drill Machinery Manufacturers and Distributors
- Horizontal Drill Spare Part Manufacturers
- Bentonite Manufacturers
- Pipe Jacking Service Companies
- Pipe Jacking Machinery Manufacturers and Distributors
- Boring Pipe Manufacturers
- Microtunnel Service Companies
- Microtunnel Machinery Manufacturers and Distributors
- Shaft Digging Service Companies
- Pipe Bursting Service Companies
- Pipe Ramming Service Companies
- Pipe Boring Service Companies
- Inner Pipe Coating Renewal Service Companies
- CIPP Service Companies
- CIPP Pad Manufacturer Companies
- CIPP Resin Manufacturer Companies
- Canal and Pipe Rehabilitation Robots
- Canal and Pipe Imaging Equipment
- Canal and Pipe Cleaning Equipment
- Companies Preventing Water Loss and Leakage
- Ground Penetrating Radar System/ Equipment Service Companies
- Ground Penetrating Radar System/ Equipment Manufacturers

WHY YOU SHOULD VISIT?

- The most extensive organization aimed at bringing together contractor firms and subcontractors working on infrastructure projects.
- The only exhibition where the most current technology and equipment used for infrastructure construction will be displayed.
- An exhibition that will be attended by many international institutions and organizations, and which will host scientific side events and exhibition area networking events.
- The most extensive and qualified platform to conduct research into the relevant markets.

PROFILE OF THE VISITORS

- Representatives of the relevant construction companies
- Project management companies
- Engineers, architects, surveyors, technical experts
- Vendors and distributors of construction machinery and equipment
- Work safety specialists and technicians
- Consultancy firms
- Accreditation bodies
- Construction machinery and equipment rental companies
- Technicians and officials working at public agencies and inspection bodies
- Universities and vocational training centers
- Non-governmental organizations and chambers
- Finance and insurance institutions
- Utilities (water, sewage, telecom, electricity, gas) and petroleum organizations
- Testing centers and laboratories
